DEFECT SAMPLING – AN INNOVATION FOR FOCUSED TESTING

THE BIG IDEA

- **As testers, our job is to find defects.**
 - However, we often look for only the symptoms of defects – failures.
- **All testing is sampling**
- **What if...**
 - We had ways to sample for defects?
 - Defects really *do* cluster?
 - We could predict where best to look for defects?
 - We looked for defects differently?

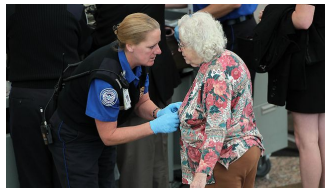

2

Defect Sampling – An Innovation for Focused Testing

THE BAD NEWS

- As testers, we suffer from the “needle in a haystack” problem.
 - Looking for something very small in something very large.
 - However, a metal detector helps!

3

RICECONSULTING

**“WE NEED
PEOPLE TO
TEST WHO
DON’T THINK
LIKE TESTERS”**

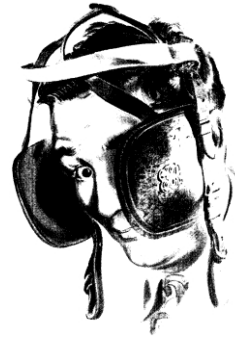

CEO TO TEST MANAGER

Defect Sampling – An Innovation for Focused Testing

WHY?

- When “professional” testers miss obvious things, business stakeholders rightly look for other solutions.
- It's common for:
 - Our methods to get old and ineffective
 - Testers to grow complacent
 - People to fail to learn
 - Our perspectives to get too narrow
 - People to have misplaced priorities

5

RICECONSULTING

A GOLD MINING ANALOGY

- Gold mining is an expensive task, even on a small scale.
 - Testing can also be expensive.
- There are often places that look promising for gold.
 - But there is no way to tell from the surface if gold is really underground.
- The only way to know for sure is to drill holes and sample the dirt.
 - In testing, we can do something similar as a way to test our intuition and suspicions about where defects may be.
 - Test automation is a creative way to drill for defects.

6

RICECONSULTING

NO HELPFUL SIGNS!

WHAT DO WE SEEK?

Failures

Internally Visible Through Structural (White-box) Testing and Static Analysis

D EXIT.

8

Defect Sampling – An Innovation for Focused Testing

THE PROBLEM

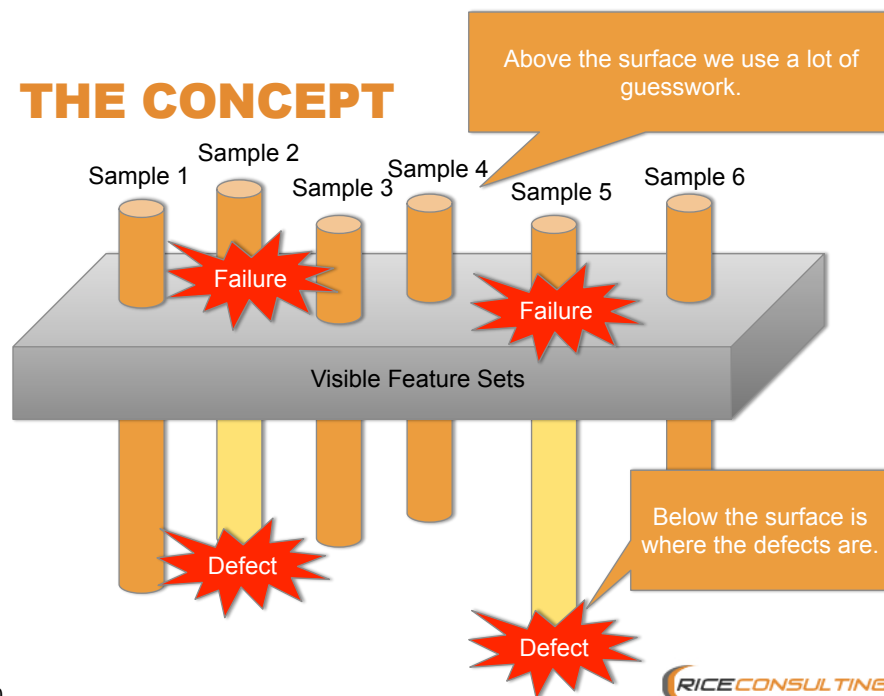

- **External**
 - Too much to cover, too little time
 - Unclear expected behavior
 - Test automation mainly used for confirmatory testing
- **Internal**
 - Lack of technical knowledge by testers
 - Lack of motivation from developers
 - Lots of code!
 - Many interactions
 - However, there are some very helpful static test tools

15

RICECONSULTING

HOW CAN WE SAMPLE?

- **Classes**
- **Risk**
- **Relationships**
- **Statistical Methods**
- **Randomly**

Defect Sampling – An Innovation for Focused Testing

RANDOM SAMPLING

- **Not a substitute for other approaches**
- **However, it can be helpful at times to help get off the beaten path.**
 - Examples:
 - The first n rows of data
 - Every nth occurrence
 - Random number generators

Defect Sampling – An Innovation for Focused Testing

HOW CAN WE LEVERAGE THIS?

- **Test Automation**
 - Frameworks to vary inputs and actions:
 - Randomly
 - Based on defect patterns and clustering

25

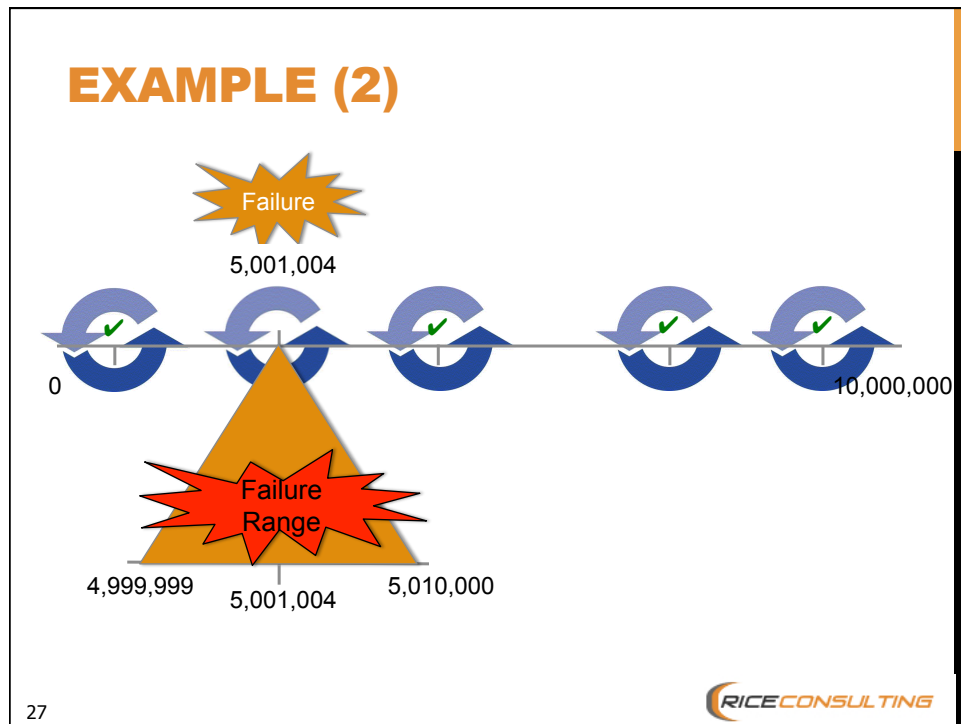

EXAMPLE

- **There are 10,000,000 possible values for a field variable to be tested.**
 1. Extract or build test data based on the values to test and the randomizing formula chosen.
 2. Create automated tests using the data as input.
 3. If a failure is seen, capture the test values and test a lower to higher range.

26

Defect Sampling – An Innovation for Focused Testing

THE MISSING LINK – FEEDBACK FROM MISSED DEFECTS

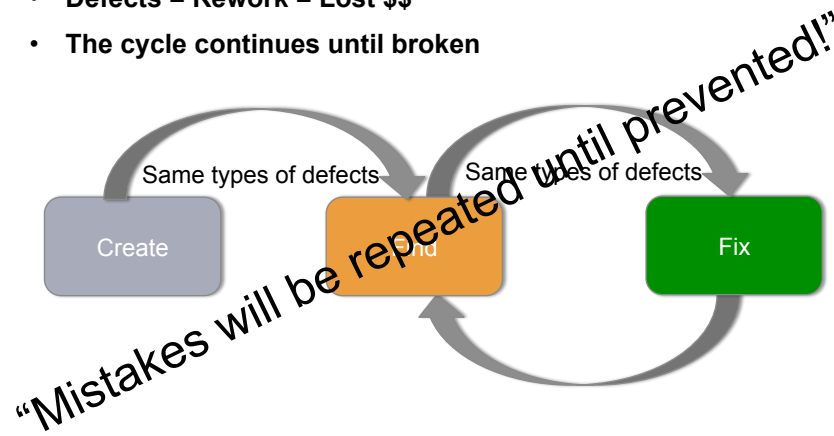

28

Defect Sampling – An Innovation for Focused Testing

ENDING THE CYCLE OF DEFECTS

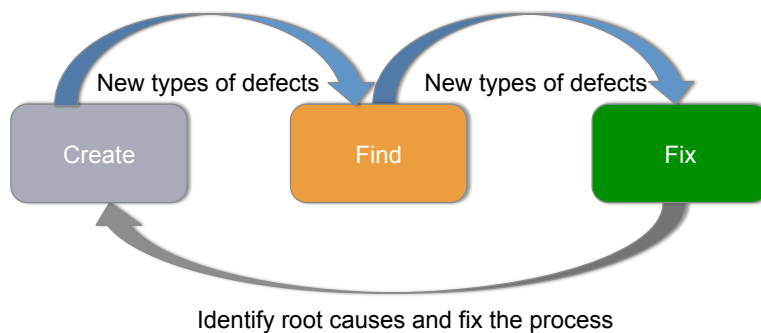

- Defects = Rework = Lost \$\$
- The cycle continues until broken

29

THE FEEDBACK LOOP

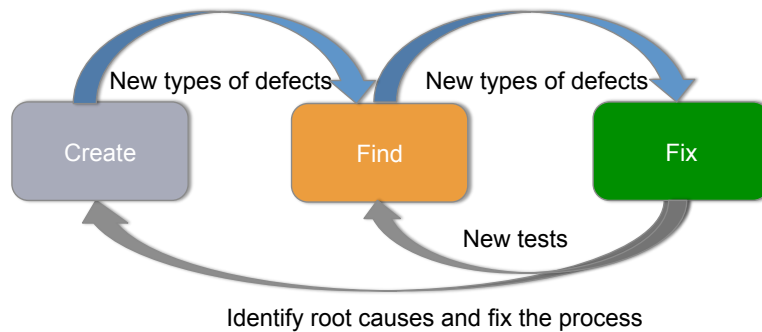

30

RICECONSULTING

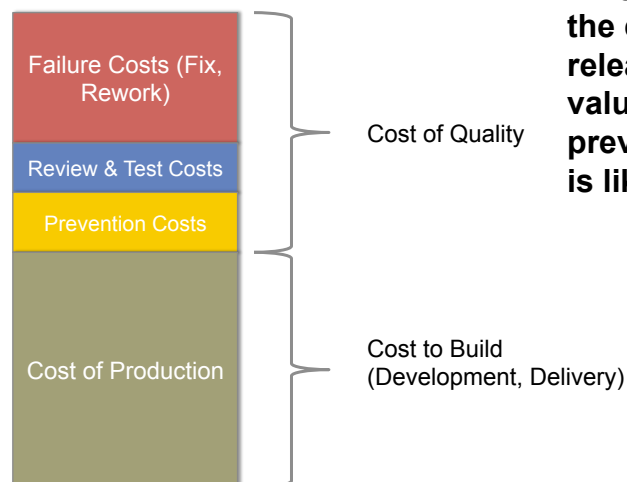

Defect Sampling – An Innovation for Focused Testing

USING DEFECT FEEDBACK FOR TEST DESIGN

31

RICECONSULTING

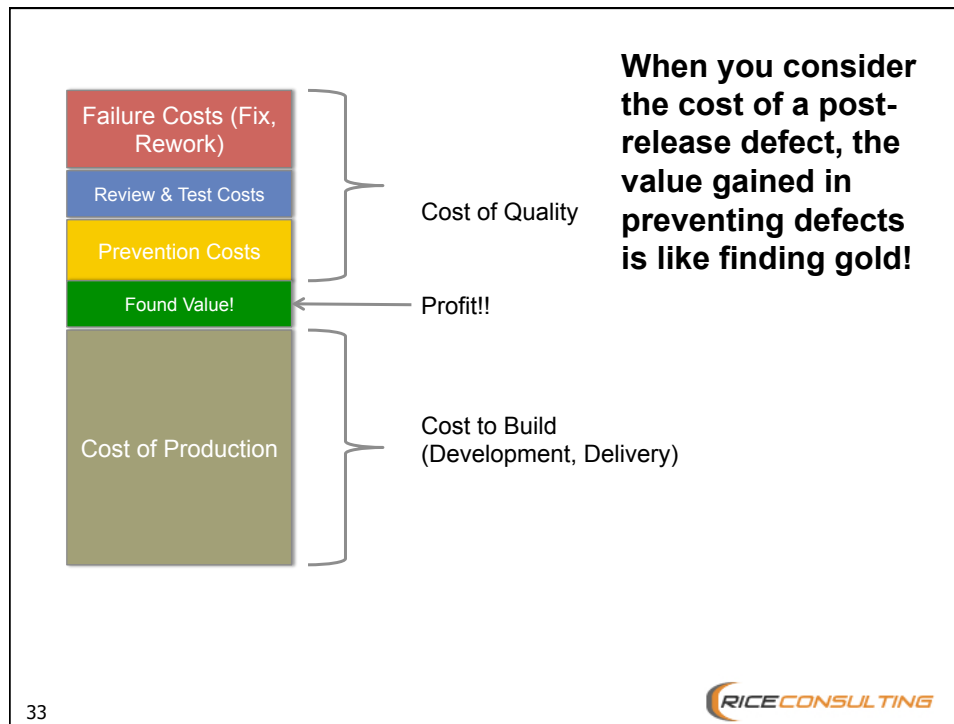

When you consider the cost of a post-release defect, the value gained in preventing defects is like finding gold!

32

RICECONSULTING

Defect Sampling – An Innovation for Focused Testing

SUMMARY

- Failures are only symptoms of defects.
- Not every defect manifests a failure.
- Not all failures are defects.
- Before spending valuable time designing and performing non-productive tests, intelligent test sampling is a good way to focus your efforts.
- No drill, no dig!
